

Tony Anglesey

Full-Stack Engineer & Founder — UI/UX, Front-End, AI-Powered Products

tanglesey@gmail.com | 312-307-9758 | github.com/tonyanglesey | New York, NY

Summary

Full-stack engineer and founder with 15+ years building production applications on modern JavaScript frameworks — from UI/UX and front-end architecture through backend infrastructure and AI-powered features. Proven track record designing and shipping real-world products end-to-end, solo and in teams, with a focus on usability, performance, and long-term maintainability.

Core Competencies

Languages & Frameworks JavaScript, TypeScript, React, Next.js, React Native, Angular, Redux, Node.js, HTML5, CSS/SCSS, Tailwind CSS, Bootstrap	Backend & Data PostgreSQL, PgBouncer, MySQL, MongoDB, Supabase, AWS, Cloudflare R2, Firebase, self-hosted deployment pipelines	AI & Auth LLM/AI inference integration, multi-model routing, BYOK architectures, WebAuthn passkey authentication
Platforms & CMS Magento/Adobe Commerce, WordPress, Drupal, Sitecore, Salesforce	Product & Design UI/UX design, wireframing & prototyping, data visualization, WCAG accessibility compliance, freemium SaaS pricing models	Tools & Practices Git/GitHub, npm package publishing, CI/monitoring pipelines, agile/cross-functional team collaboration

Professional Experience

Founder & Full-Stack Engineer — Via Ventures, Inc.

2000 – Present | New York, NY

Zen Fitness — Health & Fitness Platform ([ZenFitness.com](#) | [App Store](#))

- Designed and built a health and fitness platform spanning web and mobile applications, including UI/UX, front-end architecture, and supporting backend services to track and visualize daily activity, workouts, and wellness data.
- Developed the Zen Fitness mobile app to visualize user movement through maps, workout summaries, heart-rate data, intensity, and daily activity metrics.
- Implemented AI-powered features throughout the platform, including ZF Coach, an AI chatbot providing contextual guidance and support based on user activity.
- Continuously iterate on product features, data visualization, and user experience based on real-world daily usage.

lla.ma — Self-Hosted Developer Infrastructure Ecosystem ([lla.ma](#))

- Founded and built open-source dev infrastructure tools and hosted cloud platforms (freemium/premium SaaS tiers) as ownership-first alternatives to Supabase and Vercel.
- llama-base** ([base.lla.ma](#)): Open-source Postgres management console and database management platform (TypeScript).
- llama-apps** ([apps.lla.ma](#)): Self-hosted, git-push deployment platform and CLI ecosystem (llama-cli).
- @lla-ma/auth**: Designed and published zero-dependency WebAuthn passkey authentication library (npm), powering production auth across all cloud and OSS properties.
- Infrastructure & AI**: Architected full stack using React/Next.js front ends, PostgreSQL on AWS with PgBouncer connection pooling, Cloudflare R2, and AI inference routing with LiteLLM (BYOK support).

Lead UI/UX Architect and Developer/Engineer — KEH Camera

02/2022 – 01/2023 | New York, NY

- Led Magento/Adobe Commerce and WordPress development for a production e-commerce platform under tight delivery deadlines.
- Developed wireframes and prototypes, then delivered production-ready UI to launch.
- Partnered with stakeholders to translate business requirements into shippable front-end features on an accelerated timeline.

Lead Front End Developer — Projekt202

01/2022 – 04/2022 | Austin, TX

- Oversaw an 8-member team of developers to bring Bell.ca into compliance with WCAG accessibility requirements.

Sr. Front End Developer – React — Kove

06/2021 – 10/2021 | Remote

- Short-term 90-day contract to design and develop a greenfield application using React and TypeScript.
- Developed the sitemap, wireframes, prototype, and production-ready application using mock data and React hooks.

Front End Developer — STA Group – Cuna Mutual

01/2021 – 07/2021 | Remote

- Collaborated with a distributed team across the US to develop a loan application web app using React, Redux, TypeScript, and JavaScript.

Lead UI/UX Developer — Katch Media Group

05/2020 – 12/2020 | Remote

- Designed and developed an initial prototype for an internal web application used to manage media and over 1,500 associated genomes.
- Following prototype approval, led production development of the internal application using React 16.13, TypeScript, Firebase Authentication, and Realtime Database.

EARLIER CAREER HIGHLIGHTS

Front-end architecture and UI/UX roles across enterprise, insurance, restaurant, security, and mortgage industries. Key engagements include:

- SQUAD — Angular/TypeScript client dashboards with real-time data via WebSocket. Designed UI/UX wireframes, style guides, and interactive prototypes for data-intensive advertising analytics platforms.
- Homesite Insurance — Led migration of 110+ components from legacy React to React 16.8 Hooks.
- AAA — React/TypeScript development, custom component design development.
- TA Digital / Coveo Search — Enterprise search across web applications and Salesforce (Classic & Lightning).
- Legacy.com — Retrofitted a major legacy .NET site to fully responsive design.
- Critical Mass — Rapid prototyping with modern front-end frameworks and Sitefinity CMS.
- Mission Measurement — Designed brand strategy, style guides, websites using PHP, Angular, React, D3.
- National Restaurant Association — UI/UX development and Kentico CMS administration for customer-facing platforms.
- Bricata — Designed data analysis UI for network security products using Angular, GoLang, and D3.
- Unite Here Health — Architected front-end prototype for an online health insurance enrollment application.
- Top of Mind Networks — Built custom CRM front-end for the mortgage industry using AngularJS across two engagements.
- Compucom — Led UI/UX portal design, managed Liferay developers, developed user stories and journey maps.
- Aon Hewitt — Built high-fidelity employee portal prototypes in Liferay CMS with responsive design.
- DeVry University (Becker) — Led a 5-person UI sub-team customizing the Sterling e-Commerce platform for Becker.com.
- Sirva International — Rescued and completed a stalled mortgage-application UI build ahead of schedule.
